

VENKATESH UPPALAPATI

Assistant Manager – APS / Supply Planning

uppalapativenkatesh4@gmail.com | +91 9177854855 | Ongole | 523286

<https://www.linkedin.com/in/uppalapativenkatesh>

SUMMARY

Assistant Manager with hands-on experience across **PPC, APS, and Enterprise Supply Planning** within an integrated steel manufacturing environment. Specialized in **APS implementations (ESP, SFDC, MA)**, CRM production scheduling, and system-driven material allocation. Delivered stable planning operations through **inventory optimization, APS go-lives, automation, and measurable** productivity improvements.

EXPERIENCE

❖ Assistant Manager, JSW Steel Jan 2023
Karnataka, India

APS / Supply Planning – Material Allocator

- Managing **APS Material Allocation (MA)** for **Hot Rolled, Cold Rolled**, and Slab categories across multiple production units.
- Designed and implemented **allocation logic** in Blue Yonder APS, enabling **system-driven material matching** and reducing manual planner intervention.
- Integrated **MA outputs with SAP** and **MES/L2**, ensuring accurate WIP consumption, final goods allocation, and execution confirmation.
- Applied inventory optimization and FIFO principles to **liquidate 6,000+ tons/month of non-moving** and NCO inventory.
- Developed **Power BI dashboards** to track MA KPIs, liquidation trends, and planning compliance.
- Executed **20+ JVML MA scenarios**, go-live activities, and daily APS issue resolution.

APS Planning – SFDC Testing & Go-Live (UAT / SIT)

- Executed **100+ end-to-end UAT/SIT scenarios** across **20+ units**, validating **SFDC → SAP → MES → APS** data flow.
- Tested complex planning scenarios across **CRM, HSM, Slabs, routing changes, and inter-unit material movements**.
- Resolved high-impact system and planning issues with **IT, APS consultants, and business stakeholders**.
- Played a key role during **SFDC production go-live**, stabilizing demand-to-execution integration.

APS Planning – Enterprise Supply Planning (ESP) Module

- Contributed to **end-to-end implementation** of Blue Yonder ESP for **yearly, monthly, and weekly** planning horizons.
- Participated in **business design discussions** translating SOPs and operational constraints into APS planning logic.
- Prepared and validated master data including **BOM, routings, OEE, yield, and sourcing parameters**.
- Supported scenario **validation, feasibility checks, and data corrections with APS consultants**.

Planner – CRM Rolling Units (PPC)

- Delivered **150+ SOP-compliant CRM production schedules** achieving **100% daily production** targets.
- Scheduled production based on real-time **line conditions, grade/width constraints, and material availability**.
- Generated and analyzed **daily planning reports** (plan vs actual, production status, shortages).
- Coordinated with **Operations, Quality, APS, MA, MES, and SAP IT** teams to ensure execution stability.

EDUCATION

- RVR & JC College of Engineering 2018 – 2022
Bachelor of Technology (B. Tech), Mechanical Engineering, Guntur
CGPA: 7
- Sri Chaitanya Junior College 2016 – 2018
BIEAP - MPC, Ongole
CGPA: 89.8

SKILLS

- **APS & Planning:** Enterprise Supply Planning (ESP), Blue Yonder APS, Material Allocator (MA), PPC, Demand Planning, SCM
- **Systems:** SAP PP, MES/L2, SFDC, Blue Yonder
- **Analytics & Automation:** Advanced Excel, VBA Automation, Power BI, Agile methodologies, Performance Reporting (Plan vs Actual, Utilization, Shortages)
- **Operations:** Inventory Optimization, FIFO, NCO Liquidation, Inventory Management
- **Leadership:** Cross-functional coordination, UAT/SIT, Go-live stabilization
- **Software Knowledge:** Python, SQL

PROJECTS

- **SFDC Integrations & End-to-End APS Testing (UAT / SIT):**
 - Executed **100+ test scenarios** covering 20+ units for end-to-end material & production flow.
 - Ensured full integration between **SFDC → SAP → MES** for APS data consistency.
- **Material Allocator (MA) – APS Planning:**
 - Designed and implemented Power BI dashboards to track and report on key performance indicators, providing real-time visibility into **optimal utilization and planning compliance**.
 - Ensured full integration between **SFDC → SAP → MES** for APS data consistency.
 - Successfully **implemented MA module into live production** for Hot Rolled, Cold Rolled & Slab materials.
 - Designed and provided **allocation logic to BY Tools**, enabling automated material matching without manual intervention.
- **VBA Automation Project – MA Inventory & Action Reporting:**
 - Developed a VBA based automation tool using MA inventory input files.
 - Automated calculation of: WIP quantity totals, Average inventory age, Approved & allocated quantity aging
 - Generated consolidated action outputs and auto saved processed files.
 - Reduced manual analysis time from ~2 hours to under 3 minutes, improving accuracy and planner productivity
